

Meet renowned researcher **John R. Lott** & expert in self-defense law **Andrew Branca** at GRNC's **'Twenty Years of Victory'** Celebration & Annual Dinner

Twenty Years of Victory! In 1994, when Grass Roots North Carolina held its first rally at the state capitol, we never imagined we would be around for twenty years, much less that in two decades we would accomplish so much, including (as a small sample):

- Passing concealed carry, concealed handgun reciprocity, and the purchase permit bypass;
- Passing Castle Doctrine/Stand Your Ground; and
- Passing House Bill 937's dramatic expansion of concealed carry into restaurants, educational properties (limited), public assemblies and elsewhere.7.48

Lott Will Speak on Bogus Bloomberg 'Research' & New 'Crime Prevention Research Center'

The courts have delivered a series of defeats to the gun control movement in recent years causing gun control lawyers to cry out for evidence that gun control works and needs to happen in the U.S. Hearing their cries, Bloomberg, Soros and Obama have recently invested **hundreds of millions of dollars**, paying academic scholars in major universities to produce fake academic studies that will "prove" we need gun control.

The problem is the facts do not support gun control, so these clever academics will have to cook the studies to "prove" we need gun control. It will take academics with great knowledge of statistics to be able to find the tricks in these bogus academic studies.

This is why Dr. John R. Lott, economist and author of **More Guns, Less Crime**, and board members Ted Nugent (musician) and Brad Thor (NYT Best-Selling Author), announce the formation of the Crime Prevention Research Center (CPRC) to **expose and crush these fake studies**. CPRC is the only organization of this kind!

Dr. Lott needs you to help fund this organization to hire staff and cover the costs of getting CPRC analysis out to the public. To contribute, go to:
